News From National Scene

The newest issued of *Health Promotion Practice* includes a Western Oregon University professor's poem about getting a "gender-affirming" hysterectomy.

A perfect example of how **dangerous wokeness** is: Back in 2021 the LA Fire Department had their priorities messed up! It was passing "racial equity plans" to end "systemic, institutional, and structural racism" in efforts to map out the race of every employee to make sure they're racially diverse enough. They had determined the department was too white and male. In 2022 Kirstan Crowley, the first female and lesbian, was promoted to LA fire chief. She stated her main priority was to be a more "diverse and equitable" department.

Deputy Chief Kristine Larson, another LGBTQ leader in the department, went on camera and claimed that if she needed to carry a man out of a fire, "he got himself in the wrong place." California voters overwhelmingly approved billions to build water storage and reservoirs. So far not one has been built! Governor Newsome dumped water into the Pacific to save a fish. LA Mayor Bass cut the fire department's budget. A couple years ago the LA fire department joined others to send millions of dollars worth of equipment to Ukraine.

McDonalds has joined Walmart, John Deere, and others in rolling back their DEI initiatives. They will end specific goals for achieving diversity at senior leadership levels and end a program that encourages its suppliers to develop diversity training.
